What is ePromoter?

The ePromoter platform allows you to easily manage your screen promotions without the need for a dedicated server. It is built for easy management of content play-out of images, videos and HTML templates in local networks from an Android tablet or smartphone and consists of an Android Manager and Player App.

What market segments is ePromoter built for?

ePromoter can be used in many vertical market segments such as retail, hospitality, gastronomy, campus areas and cinemas, where the easy update of content is a requirement. Because ePromoter uses an Android Tablet or Smartphone controller, there is no need for a PC, Server or connection to existing Network.

What type of ePromoter packages are available?

ePromoter is available in several convenient bundles, including a software only option for those with existing hardware.
