

Totem ASTALON

ASTALON basic version, with keyboard and with laser printer

Product Description

The ASTALON model is a flexible unit with regard to the integration of components. In addition to numerous optional components, there is even space for a laser printer, among other things.

The door on the front side allows easy access to all components, which means paper can be refilled, for instance, without moving the machine away from the wall. Both a high quality security lock as well as the stable method of construction using steel plates enable the use of the kiosk in unattended, heavily trafficked indoor areas.

Some examples of possible uses of the ASTALON model include providing general information, for wayfinding, as a POI or POS, for time recording, for providing employee information, as a virtual porter, or for trade shows and multimedia presentations.

Individual design through the use of stick-on graphics

Basic Configuration

- Screen size 19"
- Standard electrical equipment
- Freestanding placement

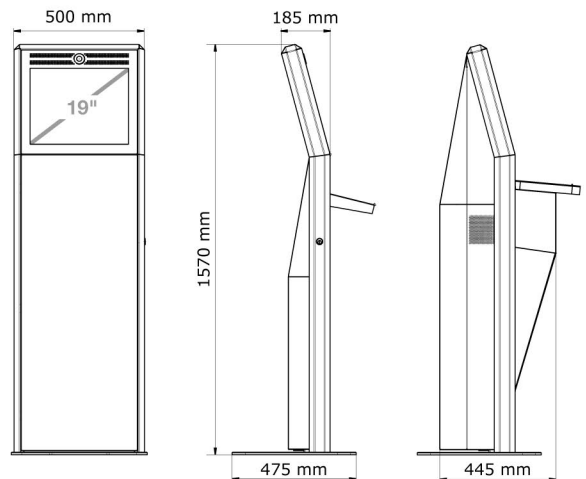

Optional Extras

- PC / MAC compatible
- Stereo sound system
- Stainless steel keyboard
