

**Totem SACHMET**

SACHMET with payment function

## Product Description

The SACHMET is a universal transaction kiosk which beside others is often used in healthcare sector.

While it is also available as a wall mount version it's characteristic feature is the electrical height adjustment.

The inside is accessible through a front door with security lock. Typical components are a 80 mm thermal printer, barcode reader and RFID readers.

In standard configuration it comes with a 21,5" Full HD touchscreen.
